Kind Attn :

Dr.PSK.R.Periaswamy, The Chairman,

Dear Sir,

Greetings!!!!

As discussed,

This is for your kind information that your organisation's ISO 9001 :2015 2nd Surveillance audit is due and we propose to conduct the audit as follows:

Audit date: 16th August 2023 to 18th August 2023.

Lead Auditor: Mr. R.Suresh (9894 995759),

Mode of Audit : Onsite.

Also we request you to kindly inform us the changes in your organization if any, before the audit (Change in employees, company name, location, scope etc.). If the same is noted during the audit, an additional audit will be required over and above the Recertification audit man-days.

Please arrange pickup / drop and stay arrangements for the Auditor accordingly.

Kindly confirm to proceed further.

Best Regards,

Objective evidences

Please have the evidences listed below ready for access by the audit team.

As required (but at least in initial/recertification or extension audits) copies of these objective evidences shall be provided to the audit team in an appropriate form to be included in the audit file. If necessary, confidential information in these dedicated copies may be blacked.

- Valid entry in professional or commercial register (or comparable evidence) - if applicable
- Organization chart/evidence of organization
- Company policy for audited management system(s)
- Overview of management system documentation (e.g. table of contents or presentation of the structure of the management system documentation, process map)
- Result of management review (e.g. cover sheet or table of contents with date and signature)
- Current annual planning of internal audits and evidence of audit report(s) (e.g.: cover sheet with date and signature)
- Standard-specific evidence, as applicable (e.g. ISO 14001: extract of environmental permit register; ISO 27001: statement of applicability, ISO 45001: accident statistics; ISO 50001: energy report as cover sheet with date and signature or evidence of continual energy performance improvement)

Explanations:**Audit objectives:**

- determination of the conformity of the management system of the organization with the requirements of the aforementioned standards in order to achieve or maintain certification through an independent and accredited certification body;
- determination of the ability of the management system to ensure the organization meets applicable statutory, regulatory and contractual requirements;
- determination of the effectiveness of the management system to ensure the organization can reasonably expect to achieve its specified objectives;
- identification of areas for potential improvement of the management system.

The audit report is drawn up in German or English language and should describe if and how far the requirements of the aforementioned standards are fulfilled.

If some requirements of the aforementioned standards are assessed as "not fulfilled" in the audit, it is possible to demonstrate subsequent fulfilment in the form of a review of documents submitted later and/or in the form of a follow up audit at the company premises, depending on the type of nonconformity.

Any objections to the planned form of the audit should be discussed and solved between the organisation and the audit team leader before the audit. Any objections to members of the audit team shall be communicated to the certification body.

All members of the audit team have declared to the certification body in writing that they will keep confidential all information which becomes known to them during the course of the audit and that no inappropriate conflict of interest exists (see Annex).

Annexes (for certification body only):

- List of participants
- Declarations of impartiality/confidentiality

Details about the remote audit (if applicable)

The audit was performed applying technology for information and communication ("remote") at 0%.
 Effectiveness and efficiency of the remote-part was ensured by

- ☐ experienced application of engaged technology;
- ☐ the consecutive processing of the single sessions with the individual units;
- ☐ the online interviews with different people from diverse units and various hierarchical levels;
- ☐ the separation of the audit team in individual online sessions;
- ☐ reviewing an adequate sample of documented processes and/or information;
- ☐ the discussion of appropriate charts, diagrams, slides or any other relevant information;
- ☐ the presentation and discussion of photos, videos and audios of issues, being prepared on detailed guidance and governance of the audit team.

Details about reviewed information or documents, interviewed persons, content of videos & photos etc. are recorded in the report or (handwritten) notes.

If the audit was performed partly remote, the corresponding sessions are identified unambiguously in the audit plan.

Distribution/Confidentiality/Rights of ownership/Limitations/Responsibilities

This report is sent to the certification body or bodies, the members of the audit team and the audit representative of the organisation. All documents (such as this report) regarding the certification procedure are treated confidentially by the audit team and the certification body. This audit report remains the property of the certification body.

An audit is a procedure based on the principle of random sampling and cannot cover each detail of the management system. Therefore nonconformities of weaknesses may still exist which were not expressly mentioned by the auditors in the final meeting or in the audit report.

The responsibility for continuous effective operation of the management system always rests solely with the audited and certified organisation.

Salvo clause:

The audit report will be left to the organisation at the end of the audit - subject to approval by the certification body. The independent veto process may cause modifications or additions. In these cases a modified revision will be sent to the audited organisation.

Conclusion

Taking into account the size and structure of the organisation, the objectives, the scope of the management system, the processes and the outcome, the organisation has demonstrated, that it operates its management system in order to ensure fulfilment of its own requirements, the requirements of its customers and the relevant legal requirements as well as the applicable requirements of the management system standards.

This includes in particular: the objective evidences already mentioned,

- the policies and objectives and their implementation in the organisation,
- the processes existing in the management system and their interactions,
- the resource management,
- the measuring and analysis (incl. sample of indicators),
- the continual improvement process as well as
- the recording system (p.r.n. including standard specific objective evidences).

The implementation and the effectiveness of the management system and the processes for providing services/product realisation or to realize the objectives were assessed by the audit team by means of on-site inspection and examination of documents on a random sample basis.

Nonconformities are recorded in corresponding reports, other findings (as e.g. opportunities for improvement) are described in the section for "Detailed Results".

Audit findings
Notes for the findings

The evaluation of the audit findings basically follows the scheme shown below:

Stage	Classification	Meaning
NC A	Major Nonconformity (Nonconformity A "major")	Nonconformities could be classified as major in the following circumstances: <ul style="list-style-type: none"> • If there is a significant doubt that effective process control is in place, or that products or services will meet specified requirements, • a number of minor nonconformities associated with the same requirement or issue could demonstrate a systemic failure and thus constitute a major nonconformity.
NC B	Minor Nonconformity (Nonconformity B "minor")	Nonconformities could be classified as minor, if these do not affect the capability of the management system to achieve the intended results.
OPI	Opportunity for improvement	Items which would allow optimisation of the management system in relation to the requirements of the relevant standard. It is recommended that the company implements these items
GP	Positive aspects / Good Practice	Positive aspects of the management system worthy of special mention (see also point 4.3 if applicable).
CM	Comments	Special situation and information to be traced in next audit.

If applicable: Guidance for management of nonconformities

The organization shall perform a root cause analysis for any nonconformity and define adequate corrective actions. Root cause analysis, corrective actions including action plan for implementation and - if applicable- objective evidences for performed corrections or containment actions shall be submitted electronically to nominated lead auditor in charge on time to agreed deadline (latest six weeks after last day of the audit). The lead auditor will review these documents and shall inform organisation about the result.

The auditee organisation shall implement the corrective actions as defined in the approved action plan and review the effectiveness of implemented actions.

In the case of major nonconformities (NC A) the lead auditor shall verify the complete and effective implementation of action plan until agreed date (latest three months after last day of the audit). On decision of the auditor depending on type and extent of identified nonconformity, this can be done in a follow up audit on site or in a desktop-review of submitted documentation (objective evidence).

For minor nonconformities (NC B) it can be agreed to perform the verification of effective implementation of action plan in the next regular audit.

If any nonconformity applies for more than one audited standard, it shall be counted for every applicable standard; therefore the total number of nonconformity reports can be less than the number of nonconformities.
